

C O M P A N Y P R O F I L E

ABOUT US

GTEC Europe Srl is an Italian company that since 2004 has devoted its mind and soul in the production of uninterruptible power supply units. In over 20 years in the market, we have acquired the utmost expertise in the field of UPS, striving daily for new increasingly efficient, sustainable and cutting-edge technological solutions.

Besides creating increasingly high-performance UPS units, we are also committed to supporting every customer in the best possible way. We actually painstakingly follow up any project assigned to us, offering a support service at the highest levels of professionalism. Over the years, our experience, attention to detail and passion for our work have driven us to grow, ensuring an ever-increasing quality to our products and services.

A close-up, low-angle shot of a person's hand wearing a blue nitrile glove, reaching into a server rack. The server rack is dark grey or black, and the person is holding a white rectangular object, possibly a server component or a piece of paper. The background is dark and out of focus. On the left side of the image, there is a black rectangular box with a thin white border and two small teal triangles in the corners. Inside this box, the text "OUR VISION" is written in white, bold, uppercase letters. Below it, a shorter line of text reads "Offer the best of technology in our UPS and the utmost expertise at the service of partners." in a smaller, white, sans-serif font. The overall lighting is dramatic, with strong highlights on the server rack and the person's hand.

OUR VISION

Offer the best of technology in our UPS
and the utmost expertise at the service
of partners.

VALUES

At GTEC we believe that there is much more to the actual value of a company than its products and technologies. To us the true game-changing-factors are: considering our Partners the beating heart of our business, creating a relationship based on trust, lending a listening ear and continued support, and turning every interaction into an opportunity to build an authentic and lasting relationship.

This vision translates into solid principles that guide our work every day.

Expertise

The GTEC staff has over 20 years of experience in the field of UPS, but we are much more than this. We are constantly looking for new, increasingly efficient and cutting-edge technological solutions.

Reliability

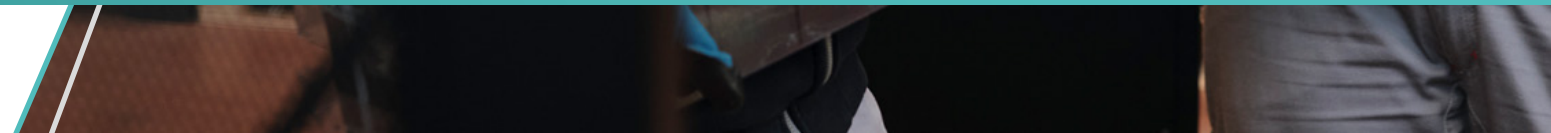

GTEC is a reliable partner that collaborates with dozens of international companies. Our reliability is not simply a reflection of the quality of the products offered, but an all-around support service.

Italian identity

We are proud of our Italian identity, which is reflected in the quality, innovation and attention to detail that characterise our work every day.

Teamwork

Our workforce is made up of highly skilled people, but human value is the first asset we look for in every employee. As a matter of fact, ours is a close-knit team with teamwork at the forefront.

A FEW FIGURES

We started as a small purely trade family business, with the ambition to grow step by step.

Since that initial idea, the project has evolved quickly and with determination we have established ourselves in the UPS market, rubbing shoulders with major international players.

50

Countries overseen
by our sales
distributors.

9

Million euros in
turnover and
constantly growing
every year.

130

Partners make up
our worldwide sales
network.

18

UPS ranges to meet
the needs of every
industry.

PRODUCTS

Our range of products includes uninterruptible power supply units of any type, from the smallest Line Interactive models to the most popular single-phase UPSs, up to the most complex three-phase, stand-alone and modular systems.

Single-phase line interactive

UPSs from 600 to 3000 VA compact and efficient, also available in Rack configuration.

Single-phase online

Uninterruptible power supplies from 1 to 10 kVA with Power Factor 1 even in smaller sizes.

Three-phase stand-alone

Powerful UPS systems, available from 10 to 800 kVA for supreme performance.

Three-phase modular

UPSs from 10 to 600 kVA flexible, powerful and characterised by n+1 redundancy.

SERVICES

To foster the best collaboration experience, GTEC constantly supports its customers and partners, providing technical assistance and after-sales service at the highest levels of professionalism. Our staff is ready to address every project in every detail and respond promptly to any concern or need.

Sizing

We assist our customers on a daily basis in choosing and configuring the UPS system that best suits their specific needs.

Installation

We provide system installation and start-up services, directly or through our approved distributors, ensuring the correct activation and safety of the system.

Maintenance

Upon request, we plan maintenance and repair of our UPSs, guaranteeing maximum availability and minimum intervention times.

Technical support

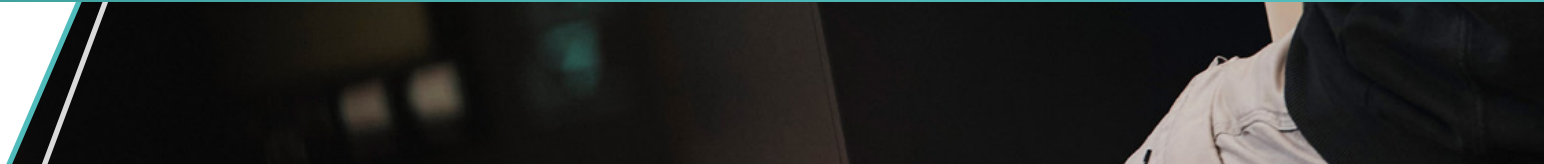

We guarantee a fast and effective customer care service, our technicians are highly specialised and have over 20 years of experience in the UPS industry.

Technical training

We organise technical training courses on GTEC products, so as to ensure that our partners are constantly updated professionally and technically on our uninterruptible power supply units.

Sales training

We regularly schedule update calls with our distributors, always ensuring the best sales support and all the marketing documentation they need.

APPLICATION AREAS

In a world increasingly dependent on the continuous availability of electricity, the UPS becomes an indispensable ally for many businesses.

We have therefore developed a wide and complete product portfolio able to meet the needs of any application industry.

Telecommunications and IT networks

Data centers, storage servers, IT systems and telecommunication services are today the beating heart of so many Companies, and they often bring huge economic investments.

Modular and rack UPSs represent the best solution to ensure continuity of service for these specific application areas, where configuration flexibility, redundancy setups, intervention speed and space management optimization represent real critical factors.

Industrial environments

Industrial environments require very strong and reliable UPS systems: enough autonomy must be guaranteed even in the hardest environment, usually characterized by dust, humidity, vibrations and high temperatures.

This kind of situations suggest to employ powerful three-phase UPSs, with high IP degree and top level performance, in order to avoid any kind of downtime that can cause long inactivity times and strong economic losses for these specific production plants.

Transport area

Nowadays the transport area is increasingly featured by sophisticated electronic devices. Infrastructures such as highways, airports, railways or subways cannot afford long downtime and at the same time they absolutely need ongoing monitoring services.

Electrical continuity must be guaranteed by technically advanced UPSs, with high protection degree and the best remote communication features available, also compliant with the standards of the specific sector.

Public services

For all those places that manage a large turnout of people, such as colleges, auditoriums, cinemas or hospitals, power supply continuity is the main key to ensure the provided service quality.

In such situations is therefore essential to rely on highly efficient UPSs that can properly work in stressful conditions, avoiding dangerous downtime thanks to their high reliability, noiselessness, and specific operating standards compliance.

Emergency applications

Emergency applications such as fire systems, carbon monoxide detectors or other alarm systems require extremely reliable UPSs, compliant to the EN50171 standard requirements.

These special uninterruptible power supplies meet the standard required by providing maximum autonomy level, minimum charging times, and an advanced overload management system.

Small office & Home office

Small companies, self-employed workers and home users increasingly need for quality power supply, in order to protect their sensitive and valuable electronic devices from power surges and blackouts.

G-Tec meets these users' needs with compact, silent, and efficient UPSs, that can be monitored by intuitive management software.

CERTIFICATES

Our company constantly commits to be aligned with the highest international standards, offering our customers the peace of mind of working with a reliable and certified partner.

ISO certificates

Since 2009, GTEC used to certify the quality management system according to the ISO 9001 standard.

Likewise, we were also awarded the ISO 14001 certificate for the Environmental Management System and ISO 45001 certificate for the Occupational Health and Safety Management System.

All certificates are renewed cyclically following the relevant periodic inspection checks.

ISO 9001

ISO 14001

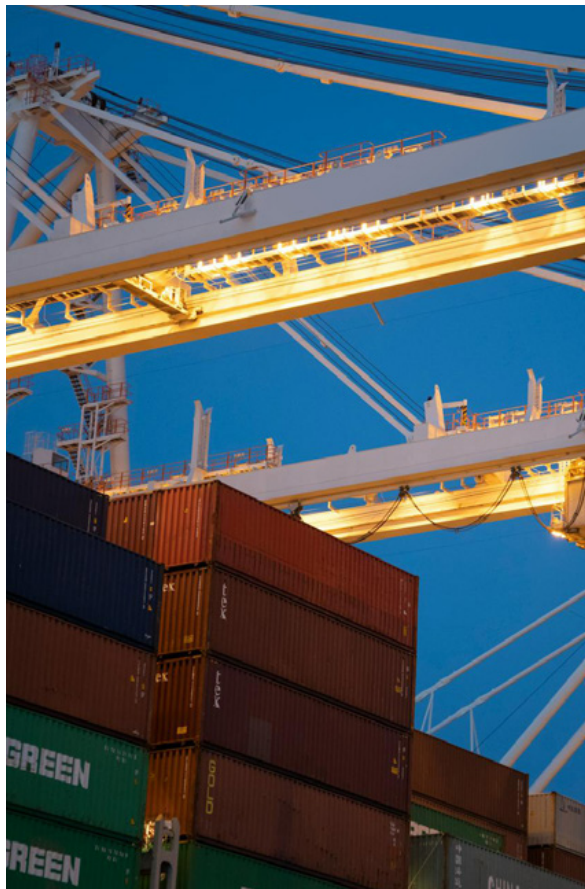

ISO 45001

Customs certificates

GTEC holds AEO – AEOc certificates that guarantee compliance with customs obligations.

We also certify the origin of goods through the Registered Exporters System (REX).

The status of approved exporter allows us to simplify customs export procedures and certify preferential origin with a declaration on the invoice or other documents.

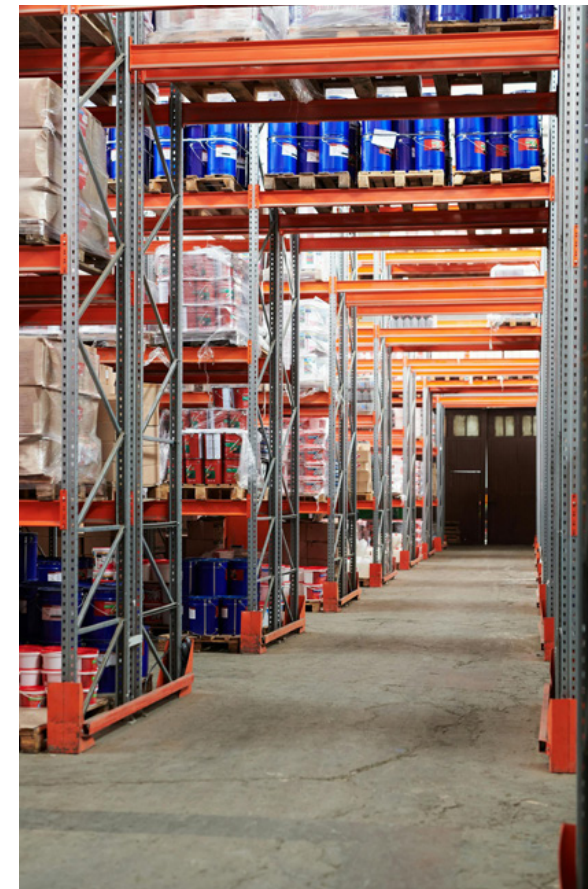

Certificates of conformity

We are able to meet the specific technical requirements for placing our products in over 50 countries around the world.

Our products can be exported for example to Saudi Arabia through SABER certification and in compliance with the SASO guidelines, and to Kuwait with the issuance of the relevant TIR/TER certificates of conformity.

Likewise, our UPSs are regularly exported to Morocco under the CMIM brand after the COC vetting process.

MARKETS

Today, GTEC is an important international company, active all over the world through a widespread network of official distributors. Our presence is particularly concentrated in Europe, the Middle East and Africa, covering more than 50 different countries.

West Europe

Italy, France, Spain, Portugal, Germany, Netherlands, Belgium, U.K., Ireland, Austria, Switzerland, Denmark, Finland, Faroe Islands, Luxembourg, Norway, San Marino, Sweden.

East Europe

Poland, Latvia, Lithuania, Estonia, Czech Republic, Slovakia, Hungary, Romania, Bulgaria, Greece, North Macedonia, Bosnia, Kosovo, Serbia, Montenegro, Albania, Croatia, Slovenia.

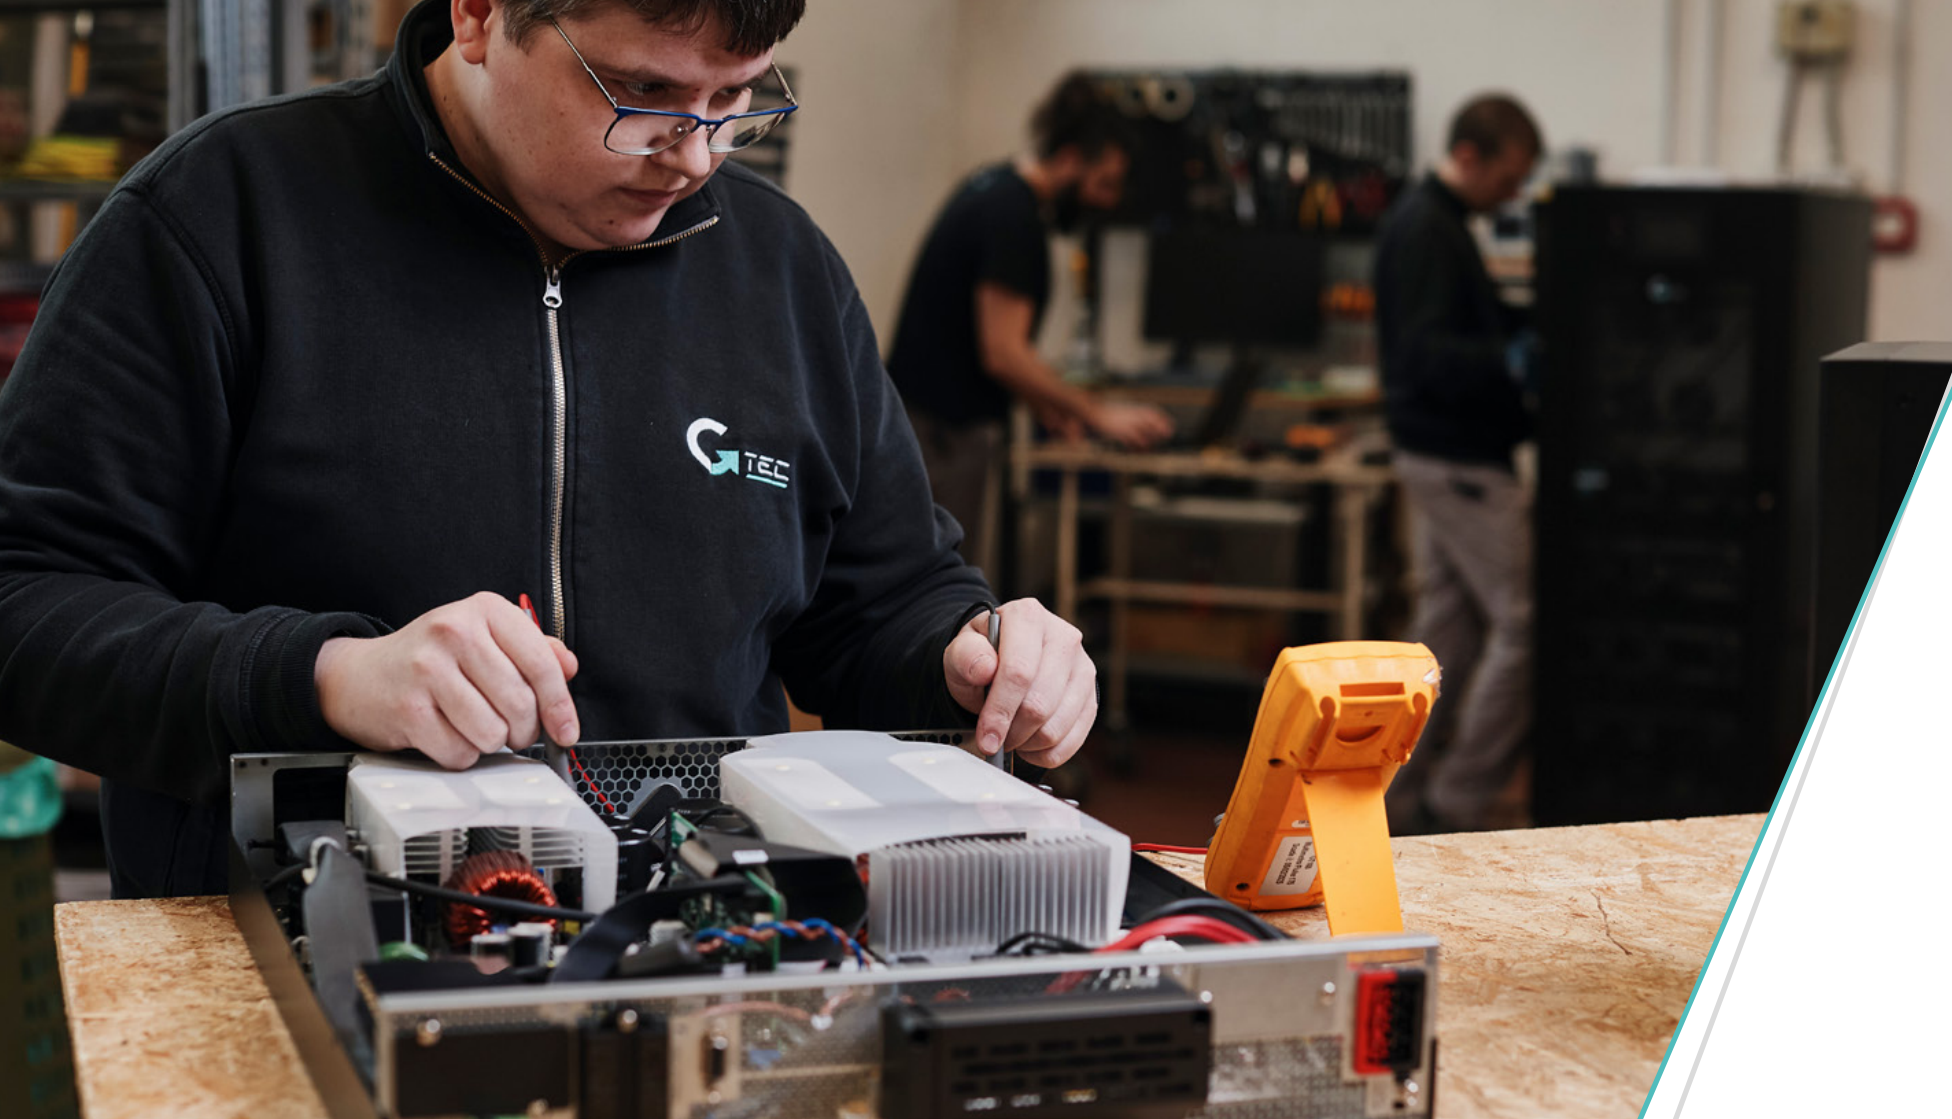

Middle East

Oman, Saudi Arabia, United Arab Emirates, Qatar, Kuwait, Lebanon, Syria, Iran, Jordan, Iraq.

Africa

Egypt, Tunisia, Algeria, Nigeria, Morocco, Senegal, Sudan, Ghana, Burkina Faso, Kenya.

SUSTAINABILITY

At GTEC we are constantly committed to making sustainable our business, our products and every aspect that concerns us, always paying the utmost attention to the impact generated on society and the surrounding environment.

GTEC UPSs are in fact made with the best available technology and high quality materials, so as to ensure excellent performance and maximum energy efficiency.

We also design our UPS units so as to facilitate the maintenance or replacement of internal elements, thus extending the service life and reducing the number of electronic equipment intended for disposal.

GRESINI PARTNERSHIP

Since 2021 we have been the technical sponsor of Team Gresini Racing in the full electric motorcycles World Championship - MotoE.

We chose this innovative and cutting-edge category because we fully share its principles and values, such as for example the orientation towards increasingly sustainable development and the reduction of environmental impact.

There are also many elements that GTEC and GRESINI RACING share, including determination and the desire to continuously improve, a fighting spirit oriented towards excellence and constant collaboration between all team members to achieve a common goal.
