

GTEC UPS MODEL:

# **SIRIUS / SATURN**

Download historical file with UcomGP

## **SERVICE DOCUMENT**

<b>Subject:</b>	<b>Preliminary Technical Specification</b>	<b>Date: 20-12-2014</b>
<b>Title:</b>	<b>How to download the historical file on Sirius series</b>	<b>Author: Gtec</b>
		<b>Rev.02</b>

### **Required equipment:**

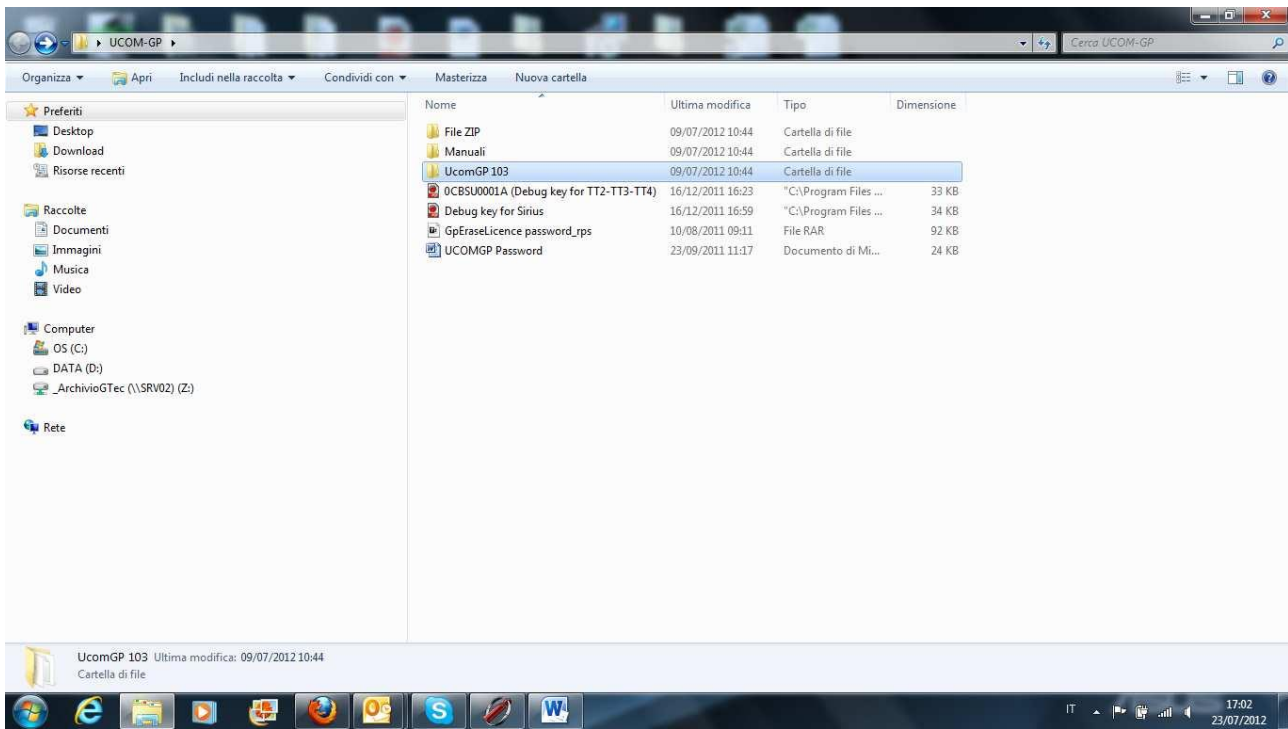

To download the historical file you need a PC and a RS232-USB converter cable (see picture).

You have to connect the RS232-USB cable converter in the RS232 serial port on the Sirius (see picture below).

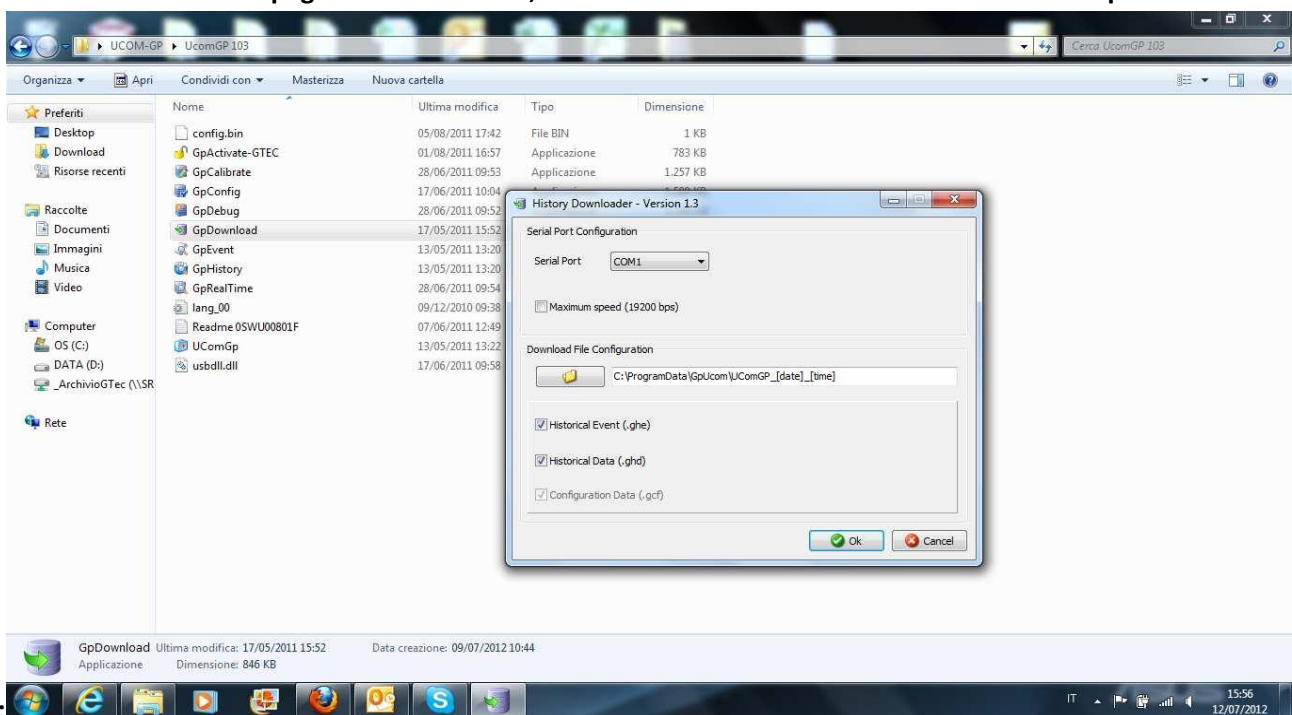

It is possible download the history with Ucom GP SW only, after you have connected the PC to the RS232 port of the UPS, open the UcomGP folder:

*for setting the parameters is necessary the license, the historical file download is free, work without license.*

**Is sufficient to select the page GP Downloads, choose the location where to save the file and press**

**OK:**

Download File Configuration. In the second box it is possible to set the download of the two types of historical file:

Historical Event (file with .ghe extension) for the UPS event log;

Historical Data (file with .ghd extension) for the UPS measurement log;

After downloading the historians, please send them to the email address: [aftersales@gtec-power.eu](mailto:aftersales@gtec-power.eu)
